# LAMINATED PLANK ROLLS MILITARY FOAM MDL [MULTI-DENSITY LAYER] RFOAM [THERMAL PERFORMANCE]

- Cost-effective cushioning for packaging applications
- High performance
- Reusable and recyclable material
- Lightweight material, easily fabricated
- Provides cube optimization
- Flexible, durable, and water resistant

# ROLL STOCK

Light, medium, and high-density thin foam for surface protection and cushioning. Nonabrasive and tear resistant. NATURAL in color.

Additional colors, dimensions, and densities available upon request.

## BLK ECO

1/2" X 48" X 125' rolls with high-recycled resin content.

# SPECIALTY FOAM

## MIL FOAM

1" extruded plank. Certified to meet MIL A-A-59136 CID specification with less than 10% LEL. NATURAL in color.

## MDL [MULTI-DENSITY LAYER]

High-density, 1/8" (or thicker) PE foam laminated to any standard plank. Creates hinge pack for reduced labor and added stability.

MDL is easily die cut and fabricated.

## RFOAM2 [THERMAL PERFORMANCE]

Nominal 1.7LB foam with increased insulating value! Standard 1.7LB RFOAM has an R value of 2.8, 22% higher than regular PE foams. Reusable, thermal-insulated foam couples proven shock resistance with thermal insulation for cold chain markets.

## FR FOAM [FIRE RETARDANT]

Fire-retardant laminated plank and roll stock in 1.9LB nominal density black and light gray. Certified to meet ASTM E84, Class 1 or A. FSI - 5 (0-25), SDI - 135 (450 Maximum). Additional certifications: UL94-HBF.

**REDUCE**  
**REUSE**  
**RECYCLE**

Part of our commitment to our customers and the environment is our Customer Scrap Program which recycles and reuses scrap LDPE. Coupled with an internal closed loop recycling program and designed to save customers money by avoiding landfill expenses, RPP products help minimize environmental waste.

Our Black ECO foam product provides an economical solution for our customers - and is one of our top sellers!

With similar properties to standard laminated plank, RPP's ECO foam provides a sustainable extruded alternative with an average of 60% recycled resin content. A cost effective alternative to traditional roll and plank stock that is a good choice for the environment.

AN INDUSTRY LEADER IN ENVIRONMENTAL SUSTAINABILITY
